

SNAP & FIX FILTER CARTRIDGES

FOR DUST REMOVAL APPLICATIONS

viledon®

Snap & Fix features

- Cylindrical filter cartridges with nominal diameter of 145 mm.
- Available in different standard lengths of 300 to 1,500 mm.
- Can be obtained in two different versions for mounting plate hole diameters of 152 or 155 mm.

Construction details

- Clean-gas side installation, easy and without any elaborate screwing work. Simply press into place and the patented snap-on hooks will engage.
- The gasket firmly secured to the flange enables a perfect axial seal without any further aids like metal sleeves or spring washers.
- Application-optimized number of pleats.
- Ideally suited for replacing of filter bags.
- Ideally suited for use in suction excavators and cleaning vehicles.

- Antistatic variants have DEKRA certification.
- Data sheets with detailed information on specific dimensions can be obtained.

Filter media

- Nonwovens produced in-house with full-area thermal bonding.
- Additional finishing:
 - Antistatic
 - Nanofiber lining (sinTexx Plus)
 - PTFE membrane

Accessories

- PJR pulse-jet reflectors (PJR 152–155) as accessories are the perfect match for Snap & Fix filter cartridges. They improve air pressure behavior during the filtration operation by **optimizing the intake of secondary air**.
- When handling very fine and smoke-like dusts we recommend to use **FHM 1500 precoat** or **Viledon® sinTexx Plus with nanofiber layer** for significant lifetime extension.
